## Profile

For as long as I can remember, I have been a successful student with goals. I am a third-year computer engineering student who loves using computers and is interested in learning new things. I know Java at a good level and I know C#, Python, JavaScript, HTML, CSS programming languages at an intermediate level. I'm trying to develop projects via Kotlin. I can use the Excel program. I studied English preparatory class at university for 1 year. I speak English at B2 level. I worked as a barista and receptionist at the hotel during the summer months. I am good at making coffee because I have barista experience. Since I worked in the reception department, I learned to communicate strongly with people and I have high persuasion skills. I learned to approach problems at work in a solution-oriented manner. I can adapt to any environment. I am a friendly and easy-going person. I believe that one should constantly gain different experiences in life.

---
